

Angie Corson MSc., Vice President

Angie Corson is a Senior Biologist with Blue Heron Environmental. She graduated with a Masters of Science in Biology and an Environmental Certificate from Laurentian University. Ms. Corson has over 10 years of working experience both in the field and writing ecological reports. Ms. Corson has considerable experience assembling environmental reports and performing many types of environmental studies. Angie has performed studies in: Environmental Impact Studies, Site Evaluation Reports, Fish Habitat Assessments, Stream assessments, Natural Heritage Evaluations, Ecological Baseline Studies, Species at Risk Evaluations and Surveys and detailed Vegetation Inventories including Closure Monitoring. Ms. Corson is certified to perform Wetland Evaluations in Ontario (OWES) and trained in the Ontario Ministry of Natural Resource (OMNR) ecological classification system. Angie has published several research papers.

Ms. Corson has operated as an independent environmental consultant, further refining her networking and writing skills. Ms. Corson's work also extends into the field, identifying significant wildlife habitat, performing species at risk surveys, and impact mitigation. In addition, she has working experience in the mining industry on numerous projects including Environmental Evaluations, Re-vegetation Protocols for closure plans, Data collection and environmental monitoring.

"I want to be involved with the Friends of the Porcupine Lake Watershed because I grew up around the Lake and I care a whole lot about the future of our Watershed."
