FRIENDS
OF THE
PORCUPINE RIVER
WATERSHED

Our Mission

Improving water quality and safe recreational use of the Porcupine River Watershed; through public education of conservation and sustainable practices.

To provide community based guidance for the good management, enhancement and utilization of healthy, sustainable, aquatic and terrestrial ecosystems.

About us

The Friends of the Porcupine River Watershed is a not for profit (for public benefit) organization founded in November 2014. The main goal of the organization is to offer public support and further enhancement to the Porcupine River Watershed Remedial Action Plan (RAP). These are actions recommended to restore the beneficial uses and to enhance the ecosystem of the Porcupine River Watershed which includes Porcupine River and Porcupine Lake.

In July 13, 2018 the Friends of the Porcupine River Watershed merged with the Porcupine information group to bring new opportunities to improving the watershed.
